

HANIN ADEL

Jeddah, Saudi Arabia

0533802869 | haninalmutairi2@gmail.com

Computer science student at King Abdulaziz University with a strong passion for programming, robotics, artificial intelligence, and educational technology. Experienced in backend development using Python and Django, and actively engaged in building real-world tech solutions. Winner of the 2025 EduThon for creating an interactive AR and 3D-based learning tool. Enthusiastic about exploring how AI and robotics can revolutionize learning and problem-solving. Known for initiative, teamwork, and a continuous drive to grow in advanced technology environments.

EXPERIENCE

Personal Portfolio Website

2025 – Present

- Developed a personal website using Django to showcase technical work.
- Implemented responsive design with HTML, CSS, and JavaScript.
